

Macintosh OS X

Sawgrass Palette Swatch Library: Photoshop Elements 8 & 9

Before proceeding, be sure you have the correct ICC Profile installed. For assistance with ICC Profile installation, refer to the Installation Guide.

The Sawgrass Palette Swatch Library is installed during the installation of the ICC Profile. This Library is a collection of preset colors which are handpicked and highly suitable for use in creating designs when printing with ChromaBlast-R or SubliJet-R ink. The ICC Profile installer also includes a “Proof Palette”. The Proof Palette can be printed and transferred to create a color matching swatch booklet. The swatch booklet can then be used as a reference guide to see how colors on screen will appear once pressed to a desired medium.
